

Bee-Bot is an exciting little robot designed for use by young children. This colourful, easy-to-operate, and friendly little robot is a perfect tool for teaching counting, sequencing, estimation, problem-solving, and just having fun! Children will create simple algorithms.

Directional keys are used to enter up to 40 commands which send Bee-Bot forward, back, left, and right. Pressing the green GO button starts Bee-Bot on its way.

Bee-Bot blinks and beeps at the conclusion of each command to allow children to follow Bee-Bot through the program they have entered and then confirms its completion with lights and sound.

Children want to use Bee-Bot over and over and are inspired to enter ever more creative and complex command sequences.

Bee-Bot moves in 15cm steps and 90 degree turns. Bee-Bot is child and classroom friendly and boosts enthusiasm for experimentation and learning wherever it is used.
