

## 2018 Term 1

What a busy and wonderful start to 2018 Robokids has had. Our Robokids teams are growing due to popular demand, we are so excited to work with more teachers and students in all school sectors. This year we have welcomed to our team; Ian Anderson NSW Penrith Lower Blue Mountains Claire Grady VIC Melbourne Central and Morgan Chris SA Adelaide South East. We are continued to be supported by some of Australia’s most innovative and creative companies. We warmly thank you for your continued support and recommendations. Robokids is now delivering to over 22 000 students annually across Australia.

Perhaps the most exciting news is our partnership with Toyota on an exciting project in Melbourne’s West for 2018/19. We will be delivering over 56 workshops to over 1250 students in schools underrepresented in STEM/STEAM. If you happen to be in Melbourne’s West get in touch with us at [info@robokids.com.au](mailto:info@robokids.com.au). Since December we have extended our Corporate Partnerships with CBA, Stocklands and welcome The Event Space to our corporate programs

We are in the process of getting our courses accredited with state curriculum bodies, we are starting with NESAs the NSW Educations Standards Authority.

Our teams are travelling all over Australia in the April holidays from the Pilbara in WA, to Melbourne & Sydney. We are continuing our outreach program in Wagga assisting teachers to further develop their digital capacities with our TPL’s and facilitating the development of their robotics programs. Robokids proudly continues to support the Smith Family by sponsoring a child in education.

Have a wonderful April holiday break, thank you for your support. On behalf of the team and I we look forward to working alongside of you.
