

## **Workshop 4: 21st Century Learning - teaching computational thinking with Robokids**

Our fourth workshop is hosted by award winning 21st century learning facilitator [Robokids](#) who use cutting edge robotic technology to introduce educators, and children, to new educational approaches to problem solving that fosters computational thinking and can be incorporated in day to day programs. Attendees to this workshop will be introduced to the notion of computational thinking, what it is and why it is important and then with the help of a range of robotic props, learn how to incorporate teaching strategies that foster and engage children to embrace creative problem solving into their programs. Robokids is endorsed to provide **NESA** Registered Professional Development for teachers accredited at Proficient Teacher level.
